

Clorox Healthcare® and CloroxPro® cleaner disinfectants can be used on durable coated fabrics from The Mitchell Group.

Mitchell™ is a converter of polyurethane (PU), polyvinyl chloride (PVC) and silicone upholstery fabrics that are used in a range of commercial markets, including healthcare settings, hospitality, offices, schools and colleges.

Following testing for compatibility, two Clorox Healthcare® and three CloroxPro® cleaner disinfectants are recommended for use on five Mitchell™ brands of coated fabrics with no rinsing and drying of the fabric required after application.

Using cleaner disinfectants that are compatible with fabrics used in healthcare and commercial settings helps maintain a clean and healthy environment. The information here should be useful for designers, architects, manufacturers of healthcare, dental and commercial furniture, hospital planners, specifiers and healthcare infection preventionists.

How to use these Clorox Healthcare® and CloroxPro® products on Mitchell™ fabrics

1. Remove visible soil such as dirt and organic material.
2. Apply the disinfectant following the directions for use on the product label. Ensure that the surface stays wet for the contact time listed on the product label.
3. Allow the surface to dry.

Tips for using cleaner disinfectants and fabrics:

If you want the fabric to look its best, wipe periodically with a damp cloth to remove residue. If the fabric is scratched, torn or damaged, rinse and dry the fabric surface after application of the disinfectant.

Use any of these five Clorox Healthcare®/CloroxPro® products on any of the five Mitchell™ fabric brands shown here

Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes

An alcohol-free quaternary ammonium chloride-based wipe with low odor, low residue and a 2-minute contact time.

Clorox Pro® Total 360® Disinfectant Cleaner

A quaternary ammonium chloride-based EPA-registered electrostatic chemistry that disinfects and sanitizes hard and soft surfaces. It has been tested for use through handheld, backpack and cart sprayer devices to ensure safety, compatibility and consistent performance. Effective against 51 pathogens, including SARS-CoV-2 in 2 minutes or less.

Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectants

With broad surface compatibility, low residue and a 1-minute contact time, these hydrogen peroxide cleaner disinfectant wipes and liquids are designed for use on common hospital surfaces.

Clorox Pro® Disinfecting Bio Stain and Odor Remover

This versatile hydrogen peroxide-based disinfectant can be used on a variety of hard and soft surfaces. Its one-step action means that it cleans, disinfects against bacteria and viruses, and deodorizes in one step. It is also a proven sanitizer on soft surfaces made from cotton, polyester and blends.

Clorox Pro® Clorox Disinfecting Wipes

Clean and disinfect 99.9% of germs in one easy step with this quaternary ammonium chloride-based wipe. These wipes are effective against over 20 bacteria and fungi in 4 minutes and over 20 viruses, including the SARS-CoV-2 virus, in 15 seconds.

Sta-Kleen® Silicone — Sta-Kleen® Silicone is the newest innovation in the Sta-Kleen® family of coated

fabrics made from 100% silicone with a 100% polyester double-knit backing. It is one of the most environmentally friendly coated fabrics available today. The manufacturing process does not use any solvents and very little water or energy. There is no VOC released, no organic pollutants and no toxic byproducts. Sta-Kleen® Silicone is eligible for LEED interior building materials credits. Suitable applications include healthcare, hospitality, contract (offices), automotive and outdoor/marine.

Sta-Kleen® Polycarbonate (PC) — A polyurethane coated upholstery fabric made from

a 100% polycarbonate resin system. The polycarbonate resins provide for unsurpassed strength and durability. The combination of the polycarbonate resins and Sta-Kleen stain resistance means Sta-Kleen PC can withstand the chemical disinfectants used in commercial environments such as hospitals, nursing homes, schools and colleges.

Sta-Kleen® Performance - The first, and only, true dry-erase urethane upholstery that wipes

out food stains, wine and juice, scuffs, pen and marker, and creams and lotions. Sta-Kleen® is a permanent part of the upholstery, not a topical application — it will last the lifetime of the upholstery. Sta-Kleen® is available in dozens of classic and trendy patterns and colors, and is suitable for use in the hospitality, commercial, healthcare and residential furniture markets.

Grand Slam® — A designer-exclusive collection of high-performance vinyl fabrics that exceeds all industry performance standards. Grand Slam®

is environmentally friendly. It does not contain dangerous phthalates typically found in vinyl products. Grand Slam® has a protective coating proven to withstand the chemical cleaners most widely used in commercial environments such as healthcare, contract (offices) and hospitality. Grand Slam® is also fire retardant, antibacterial and mildew resistant.

Ez-Kleen™ — Environmentally friendly vinyl fabrics that are phthalate free, formulated without FR chemicals or anti-

microbial additives. All patterns feature the Ez-Kleen™ stain-resistant protective finish. The patterns come in a variety of looks, including solids, embossed, metallic, distressed and weave. Ez-Kleen™ fabrics are ideal for hospitality, contract and residential applications.
